

## MAINZEAL CONSTRUCTION McLean Park Grandstand

### Overview

Patton Engineering was contracted to manufacture and erect the new 4,250 seated McLean Park Grandstand in Napier, work included all the stairways and handrails.

### Patton's Involvement

All departments of Patton Engineering were utilised for this project. A big effort was put in by all staff to help ensure the grandstand was completed in time for the first game of the Hawke's Bay Magpies 2009 Air Zealand Cup campaign – a convincing 47-13 victory over Auckland.

### Materials

Approximately 220 tonne of steel, including fabricated beams, staircases and handrails

### Our Comment

With a great sporting culture at Patton Engineering all staff enjoyed working on and watching this project come together over the 10 months of construction.

### Client

Mainzeal Construction  
PO Box 1099  
Palmerston North
